

Feather Sampler Quilt  
8 inch diameter Feather Guide Pattern  
**See instructions on the next page**

**9 inches wide**

# Feather Sampler Quilt

## 8 inch diameter Feather Guide

**Note: Outside rectangle around the pattern piece MUST measure 9 inches wide x 5 inches tall.**

If the outside square does **NOT match these measurements**, adjust your printing controls or “print scale”.

The diameter of the outer circle of the **Feather guide is 8 inches.**

### Instructions -

**Version 1** - If you have a large piece (11 x 17 inches) of piecing template plastic -

- Print **2 copies** of the pattern (see next page).
- Cut the (paper) pattern pieces along the cut line. Tape these two pieces together matching notches.
- Place the (taped) pattern piece under the large piece of translucent piecing plastic, transfer all markings then cut out.
- Note - you may need to cut a slit along one of the straight pattern lines to get into the middle of the template to cut the inner circle. If so, when finished cutting, tape the cut / slit edge together.
- Label as **8 inch diameter Feather Guide**

**Version 2**- If you have small (8-1/2 x 11 inch) pieces of piecing template plastic -

- Print **1 copy** of the pattern (see next page).
- Place this pattern piece under a piece of translucent piecing plastic and transfer all markings. Make 2 copies and cut them out.
- Put these two pieces together matching the notches and tape them together.
- Label as **8 inch diameter Feather Guide**

**Note** - I like to use clear packing tape when taping these pieces together
